

## Software Engineer, Intern

Ocient is a Chicago-based, venture-funded startup building a SQL compliant, exabyte-scale database platform that achieves 1,000x better performance than Hadoop and NoSQL systems. It is a distributed system optimized for NVMe drives, RDMA networks and high core count processors and is written in C++. We are led by a management team with seven successful startup exits, including Cleversafe which was the largest software startup exit in Chicago's history.

We are looking for interns with strong problem-solving skills and a passion for computer science. You will have a desire to hone your craft while pushing yourself beyond the standard conventions. You will be working with industry-leading software architects to help implement and test cutting-edge software solutions.

### Minimum Qualifications:

- Currently pursuing a BS, MS, or PhD in computer science, computer engineering, or related technical field
- Experience writing code to solve complex problems using an object-oriented programming language (e.g. C++, Java)
- Strong understanding and application of data structures and algorithms
- Demonstrated coding on projects outside of the classroom
- Ability to speak and write in English fluently

### Preferred Qualifications:

- Experience with systems software development on Linux using C++
- Experience with high performance, parallel computing

## Contact Information
