

.NET Software Engineer Internship

Do you want to be part of a fun and fast-paced startup that defines the next generation of consumer healthcare engagement? Through an assortment of compelling platforms, including health stations, mobile apps, and a web portal, highi works to raise consumer awareness, incentivize adoption of healthy behaviors, and improve life overall. We are looking for a current UIUC computer science undergraduate or graduate student with an interest in back-end software development.

Responsibilities:

- Help build out a new infrastructure and maintain existing infrastructure for our HIPAA-compliant API and biometric screening stations
- Work closely with the product team to build scalable software using cutting-edge back-end Microsoft and Azure cloud technologies
- Propose efficient software solutions to product management
- Participate in the technical design, implementation, and testing of new features

Qualifications:

- Undergraduate or graduate student currently enrolled in a UIUC computer science curriculum
- Strong theoretical and practical knowledge of algorithms
- Experience with C# a plus
- Experience with implementing RESTful APIs a plus
- Experience with NoSQL databases a plus
