

About this Internship:

Kenway Consulting is a Management and IT consulting firm looking for students interested in a consulting career. If you want to solve business problems using the latest technologies, and if you have the insight, creativity and perspective to drive business success, then Kenway is the place for you.

Kenway is currently looking for interns focused on designing, enhancing, and developing technology solutions that solve critical business problems. Kenway seeks entrepreneurial individuals with an interest in being a part of a dynamic and growing firm.

What we are looking for in our candidates:

- Excellent communications skills, including the ability to lead meetings and deliver presentations
- Ability to participate in multiple projects simultaneously
- A unique ability to bridge the communications gap between business and technology resources
- Entrepreneurial spirit and a willingness to participate in the growth and development of the company
- Curious minds that expect to be challenged daily
- Experience with the following technologies
 - Relational Databases, Normalization, SQL, ETL
 - .NET / Java
 - HTML / JavaScript / CSS
 - React / Angular
 - BI Tools: Qlik, Power BI, Tableau
 - Cloud: AWS or Azure
- Degree in Computer Science is a plus

Internship Projects:

Interns will have the opportunity to participate in projects by:

- Contributing to technology consulting engagements for clients
- Building / enhancing custom web applications
- Building / enhancing Business Intelligence solutions
- Creating data integration pipelines
- Designing data management solutions
- Enhancing and supporting internal software and cloud infrastructure

What kind of work we do:

- Cooperate closely with clients as part of a development team to evaluate requirements, develop and implement solutions
- Deliver solutions across industries in the following areas:
 - Technology Solution Delivery - Enabling people and processes through technology
 - Enterprise Program Leadership - Delivering transformational initiatives through effective skills, processes and governance
 - Information Insight - Maximizing the value from data
 - Coordinate activities with data source application owners to ensure integration and data integrity

What our company looks like:

- A highly culture-driven team working together to identify clients, technologies and people in support of Kenway's ambitious growth targets
- Our consultants participate in internal operations giving you a chance to help in your area of interest like Marketing, Human Resources or Technology

What we offer our Interns:

- An environment that encourages you to identify new opportunities and the support to make it happen
- The chance to have a balanced lifestyle by working with local (Chicagoland) clients in a flexible consulting model
- The opportunity to build and be part of a fun and collaborative culture

About Kenway Consulting:

About Kenway Consulting Kenway Consulting, a Chicago-based management and technology consulting company, was founded in June of 2004 on the principles of being good and being truthful. In doing so, we strive to provide unmatched quality and client service. One common theme discussed with our clients is the persistent complementary need for strong leadership and execution in project settings. Since projects tend to be finite in duration, many companies fall short in addressing the short-term management needs to motivate resources, build team frameworks and most importantly, deliver on the needs of the business on-time and with quality. Companies tend to keep their best leaders and managers focused on the long-term vision of their business. As well they should. By complementing our clients' established leadership, Kenway Consulting provides deep industry and technology expertise to allow our clients to focus on their own business. Our projects tend to focus primarily on enterprise solutions, straddling our clients' technology and business organizations. Most of these engagements require a diverse combination of skills and experience. At Kenway, we address these needs by identifying the services and solutions that are required to solve our client's business challenges. We then provide the appropriate mix of resources to build the optimal project team for each engagement. This approach not only allows us to take on projects ranging in size and complexity, but it also allows us to adjust capacity and skill sets as the project evolves, or as client needs change. Ultimately, our goal is to provide the highest possible quality for the lowest possible cost. Our people come from strong consulting backgrounds, blending industry standard methodologies with deep experience in the development and management of enterprise solutions. Our business model provides you "big consulting" caliber consultants at anything but "big consulting" rates. Our people have strong backgrounds in a host of industries, technology domains, and internal business functions which will likely make us a great fit in fulfilling your project needs.
